

Digital Valves

TOGO & VENN Series can be used with any shower fittings

Power Dial

Activate the flow by pressing the control dial. Once on, turn the dial to adjust the temperature. LED lights surrounding the control dial will change colour to indicate the current temperature setting.

When you have reached your desired temperature, press the dial. This will switch to the default outlet, which is represented by a new colour and a corresponding icon on the OLED digital display panel.

Cool Touch

Our advanced shower controls and trim plates are isolated from the water valve, ensuring they're always cool and safe to touch. Unlike traditional bar or thermostatic valves, none of our exposed components can scald you.

Automatic Safety Shutdown

If the water or power supply fails, the shower will turn off completely for your safety. This enhanced safety feature gives you complete reassurance.

Digital Display

Our innovative easy to read digital display accurately outputs the precise temperature and selected outlet. Simple, clear and highly responsive.

Easy Divert

TED TOGO and VENN shower valves have a diverter function for up to 3 outlets, providing the maximum showering flexibility. Changing between outlets is easy with icons clearly indicating your selection.

Venn 2 Outlet Processor & Square Interface
